B. Use of Estimates in the Preparation of the Financial Statements

Preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Accounting Policies

Health premiums are earned over the term of the related insurance policies. Premiums written are reported net of experience rating refunds. Premiums paid prior to the effective date are recorded on the balance sheet as premiums received in advance and are subsequently credited to income as earned during the coverage period. Premium rates are subject to approval by the Centers for Medicare and Medicaid Services. Expenses are charged to operations as incurred.

NOTES TO FINANCIAL STATEMENTS

In addition, the Company uses the following accounting policies:

- (1) Short-term investments include investments, not backed by other loans, with maturities of less than one year and more than three months at the date of acquisition and are reported at amortized cost, which approximates fair value. Non-investment grade short-term investments are stated at the lower of amortized cost or fair value.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the modified scientific method, using lower of yield to call or yield to maturity. Non-investment grade bonds are stated at the lower of amortized cost or fair value as determined by various third-party pricing sources.
- (3) The Company has no investments in common stocks.
- (4) Redeemable preferred stocks of unaffiliated companies of highest and high quality are stated at cost or amortized cost, and all other redeemable preferred stock are reported at lower of cost, amortized cost or fair value. Perpetual preferred stocks are carried at fair value, not to exceed any currently effective call prices.
- (5) The Company has no investment in residual tranche securities.
- (6) The Company has no mortgage loans - real estate.
- (7) Asset-backed securities are stated at amortized cost. Prepayment assumptions for asset-backed securities were obtained from broker-dealer survey values or internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all asset-backed securities. Non-investment grade asset-backed securities are stated at the lower of amortized cost or fair value.
- (8) The Company has no investments in subsidiaries, controlled and affiliated companies.
- (9) The Company has no investments in joint ventures, partnerships or limited liability companies.
- (10) The Company has no derivative instruments.
- (11) The Company recognizes losses from other-than-temporary impairments (“OTTI”) of investments in accordance with Statements of Standard Accounting Practice (“SSAP”) No. 26, *Bonds*; and SSAP No. 30, *Common Stock*; and SSAP No. 32, *Preferred Stock*.
- (12) The Company does not anticipate investment income as a factor in premium deficiency calculations.
- (13) Unpaid claims and claims adjustment expenses include management’s best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considers health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claim adjustment expenses are based on assumptions and estimates, and while management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and changes in estimates are incorporated into current period estimates.
- (14) The Company has not modified its capitalization policy from the prior period.
- (15) An accounting policy election has been made to disregard corporate AMT when evaluating the need for a valuation allowance for its regular tax deferred tax assets.

NOTES TO FINANCIAL STATEMENTS

(4) Fair values of bonds are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. Level 2 securities primarily include United States government securities, corporate securities, securities from states, municipalities and political subdivisions, mortgage-backed securities and certain other asset-backed securities. For securities not actively traded, the pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. The Company has controls in place to review the pricing services' qualifications and procedures used to determine fair values. In addition, the Company periodically reviews the pricing services' pricing methodologies, data sources and pricing inputs to ensure the fair values obtained are reasonable.

Certain bonds, primarily corporate debt securities, are designated Level 3. For these securities, the valuation methodologies may incorporate broker quotes or discounted cash flow analyses using assumptions for inputs such as expected cash flows, benchmark yields, credit spreads, default rates and prepayment speeds that are not observable in the markets.

Fair values of common and preferred stock are generally designated as Level 1 and are based on quoted market prices. For certain common and preferred stock, quoted market prices for the identical security are not always available and the fair value is estimated by reference to similar securities for which quoted prices are available. These securities are designated as Level 2. Certain equity securities, including private equity securities, for which the fair value is estimated based on each security's current condition and future cash flow projections. Such securities are designated as Level 3. The fair values of these private equity securities are generally based on either broker quotes, or discounted cash flow projections using assumptions for inputs such as the weighted-average cost of capital, long-term revenue growth rates and earnings before interest, taxes, depreciation and amortization, and/or revenue multiples that are not observable in the markets.

Cash equivalents primarily consist of highly rated money market funds or bonds with original maturities of three months or less. Due to the high ratings and short-term nature, these investments are designated as Level 1. The Company also holds bonds purchased with less than three months to maturity. Fair value of these bonds are based on quoted market prices obtained from third party pricing services which generally use Level 1 or Level 2 inputs.

There have been no significant changes in the valuation techniques during the current period.
