Prior Authorization Criteria
Tezspire® (tezepelumab)
Effective 11/15/2023**

Prior Authorization Request Form

TEZSPIRE (tezepelumab) is a thymic stromal lymphopoietin (TSLP) blocker, human monoclonal antibody (IgG2λ), indicated for the add-on maintenance treatment of adult and pediatric patients aged 12 years and older with severe asthma.

Limitations of Use: Not for relief of acute bronchospasm or status asthmaticus

CRITERIA FOR APPROVAL:

1. The patient must have a diagnosis of severe asthma that is uncontrolled or inadequately controlled as demonstrated by experiencing at least one of the following within the past year: ≥ 2 exacerbations requiring oral or injectable corticosteroid treatment; OR ≥ 1 exacerbation resulting in hospitalization or emergency medical care visit; **AND**
2. Must be prescribed by or in consultation with an allergist, immunologist, or pulmonologist;
AND
3. The patient must be within the age range as recommended by the FDA label and indication;
AND
4. The patient must have documented adherence to a therapeutic regimen consisting of a LABA + high dose ICS therapy in the last 90 days; **AND**
5. **If** patient has asthma with an eosinophilic phenotype, documentation must be supplied indicating one of the following:
 - a. A positive sputum test for eosinophilic phenotype asthma with sputum eosinophil level $\geq 3\%$; OR
 - b. Asthma with eosinophilic phenotype with blood eosinophil count greater than or equal to 150 cells/mcL within the past 6 weeks or blood eosinophil count greater than or equal to 300 cells/mcL in the past 12 months; OR
 - c. Claims data that reflect a continual reliance on oral corticosteroid therapy in the last 90 days.

**STATE OF WEST VIRGINIA
